Main Features of this Decoder:

<u>BEMF Load Compensation:</u> Provides superior slow speed control performance under load.

<u>Quiet Drive:</u> Super-quiet motor control for "buzz" free motor performance.

<u>DC Mode:</u> Decoder will automatically detect DC power. You can also configure how your lighting effects function on DC.

Variable Momentum: Allows you to make custom acceleration and deceleration curves.

<u>+12V Lighting</u>: This decoder uses an unregulated 12V supply for lighting. For use with LED's, you must include current-limit resistors ($1K\Omega$ recommended).

Function Remapping: Buttons 0 through 12 may be used to control the lighting functions of this decoder.

Programmable Lighting Effects: Choose from 20 separate userprogrammable lighting effects!

Decoder Lock: Feature which prevents accidental/unwanted programming

Speed Tables: Configure custom speed curves and set speed limits.

Other Features of This Decoder: This decoder has more features than could be listed in this pamphlet. For the complete list of available features, visit our website <u>tcsdcc.com</u> to download the "Comprehensive Programing Guide" found in the Documentation section of our website.

WARRANTY PROCEDURE: All decoders are covered by a one-year warranty. This decoder must be returned in a small box.

- 1. For registration, more details, and disclaimers, visit tcsdcc.com/warranty
- 2. Print out a copy of the Warranty Registration and include it in the box
- 3. Return decoder(s) directly to TCS using the address below.

Compatible with NMRA DCC standards

Designed & Built by TCS in the USA

Train Control Systems P.O. Box 341 845 Blooming Glen Rd. Blooming Glen, PA 18911

Phone 215-453-9145 Fax 215-257-0735 Email tcs@tcsdcc.com Web www.tcsdcc.com

Backed by our famous "GOOF-PROOF" Warranty

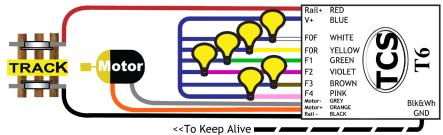

Dimensions: 0.661" x 0.969" x 0.193" or 16.79mm 24.61mm 4.9mm

The T6X is a 6-funtion, multi-purpose HO-scale decoder. This decoder may be hard-wired or plugged directly into any locomotive with a 9-pin JST plug. The T6X may be used in locomotives which have directional ditch lights in addition to forward and reverse headlights.

!!!WARNING!!! This package does not include a wiring harness. This SKU number assumes you already have a wiring harness in your loco.

WIRING DIAGRAM

Diagram drawn for clarity - wire decoder per the written wire colors. The wires on your decoder may not be lined up the same as the diagram.

INSTALLATION

For detailed installation examples visit our website where we maintain a constantly growing database of a wide range of locomotives and decoders.

BASIC CONFIGURATION

www.tcsdcc.com and check out the Complete Programming Guide.					

MOTOR CONTROL

Speed Graph					
CV 2	0		Start Volts Set the voltage when the throttle is first applied.		
CV 6	0		Mid Volts Set the voltage when the throttle is at midpoint.		
CV 5	0		Top Volts Set the voltage when the throttle is at full speed.		
Momentum					
CV 3	1		Acceleration Larger values add time to each speed step.		
CV 4	1		Deceleration Larger values add time to each speed step.		
CV 23	0		*Acceleration Adjustment when in Consist		
CV 24	0		*Deceleration Adjustment when in Consist		
*Values above 128 increase the adjustment * Values below 128 decrease the adjustment					
Motor Trim					
CV 66	0		Forward Trim	Values above 128 increase speed,	
CV 95	0		Reverse Trim	values below 128 decrease speed.	

LIGHTING CONTROL

Lighting Features

Light Function Wires			
CV 49	0	White Wire	F0F
CV 50	16	Yellow Wire	FOR
CV 51	32	Green Wire	F1
CV 52	32	Violet Wire	F2
CV 53	32	Brown Wire	F3
CV 54	32	Pink Wire	F4

Rule 17 Dimming Control

Rule 17 Dimming is turned on and off by button 4 as the default, but this value can be remapped via CV 123. See the Function Remapping guide in the lighting section of docs.tcsdcc.com for more info.

Light Effect	fwd	rev	both
Constant Bright Light	0	16	32
Random Flicker (fire box) 1	1	17	33
Mars Light	2	18	34
